

# Comtech Grout W40

Cement based tile grout for ceramic and natural stones tiles.

## Description:

**Comtech Grout W40** is a fine modified powder which, when mixed with water, gives a smooth, easily applied creamy paste for clean grouting of ceramic tiles. It sets to a decorative water resistant finish.

## Method of use:

Allow at least 24 hours between fixing tiles and grouting. Mix grout powder with 8 to 9Ltr of water for 15kg to give a smooth, thick consistency.

Leave to stand for 15 minutes before using. Apply to tile joints with a squeegee, brush or sponge.

Remove surplus grout with a damp sponge.

When grouting is completed, polish tiles with a dry cloth.

## Advantages:

- Resistant to cracking in joints up to 10mm wide.
- Water-resistant (suitable for swimming pools).
- Available in a wide range of colors.
- Ideal for internal and exterior applications.
- Formulated for Middle East conditions.
- High adhesive bond strength.

## Coverge:

1kg is sufficient for approximately 4 square meters using standard tiles 150 x 150mm.

## Packaging and storage:

**Comtech Grout W40** is supplied in 25kg bag; All Comtech products should be stored in a dry shaded area, protected from breakage, deterioration and contamination.

## Health and safety:

**Comtech Grout W40** does not classified in the hazardous materials; however it should not be allowed to come into prolonged contact with skin and eyes.

The normal safety precautions (hand gloves & safety goggles) are recommended for handling.

The first aid if some harm happened with eyes in to wash with water.
